Information Notice

Compliance and validation of REACH regulations – RSA Synthetic Rubies

Dear Partner,

Hereby, RSA Le Rubis is pleased to confirm the approval and validation of its compliance with the REACH regulations applied to all our synthetic ruby crystals manufactured at our Jarrie site in France.

These registrations allow us to date to be the only approved and registered European supplier, respecting the regulations imposed by the European Union as well as by the Swiss Confederation.

These regulations apply to the production and supply of Chromium-doped calcined alumina powder allowing synthetic crystallization of all the references of Rubies as well as crystals.

We are also taking advantage of this information notice to confirm that RSA Le Rubis highlights the non-use of Chrome VI, a highly carcinogenic product subject to authorization, throughout its production chain. This has been developed to protect all of our employees and to contribute to the environmental impact initiatives of the Swiss watch industry and the worldwide jewelry industry.

Remaining at your entire disposal for any further information,

Our best regards.
